# CHAMELEON

DIGITALFOTO RGB LED Tube Light

DigitalFoto Solution Limited developed RGB LED Tube Light which has impressive color control, light intensity, and power options. The tube employs RGB+W LEDs that not only enable color temperatures of 2800 to 9990K, but has hue and saturation control giving you access to literally millions of color combinations. The tube also has pre-programmed color effects such as Storm, Flash, Candlelight, and Color Cycle etc. Light intensity is variable from 0 to 100% and while you can make these adjustments locally on the light

The included 100 to 240 VAC adapter allows you to use it worldwide, but it will also run for up to 2.5 hours at full power using

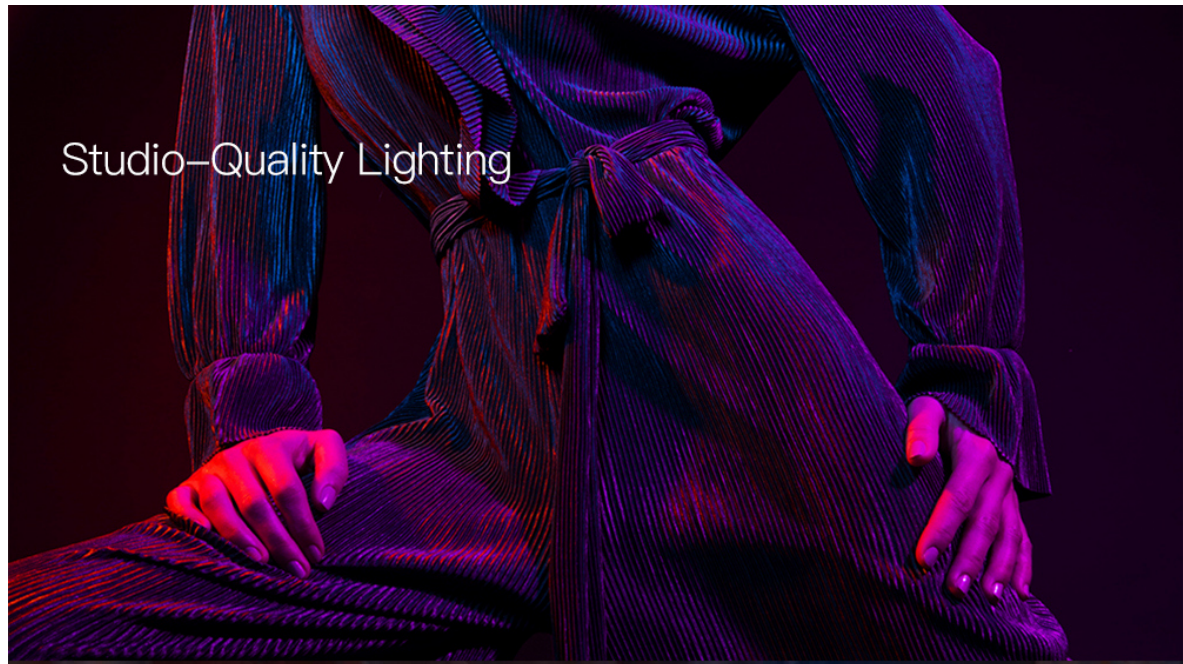

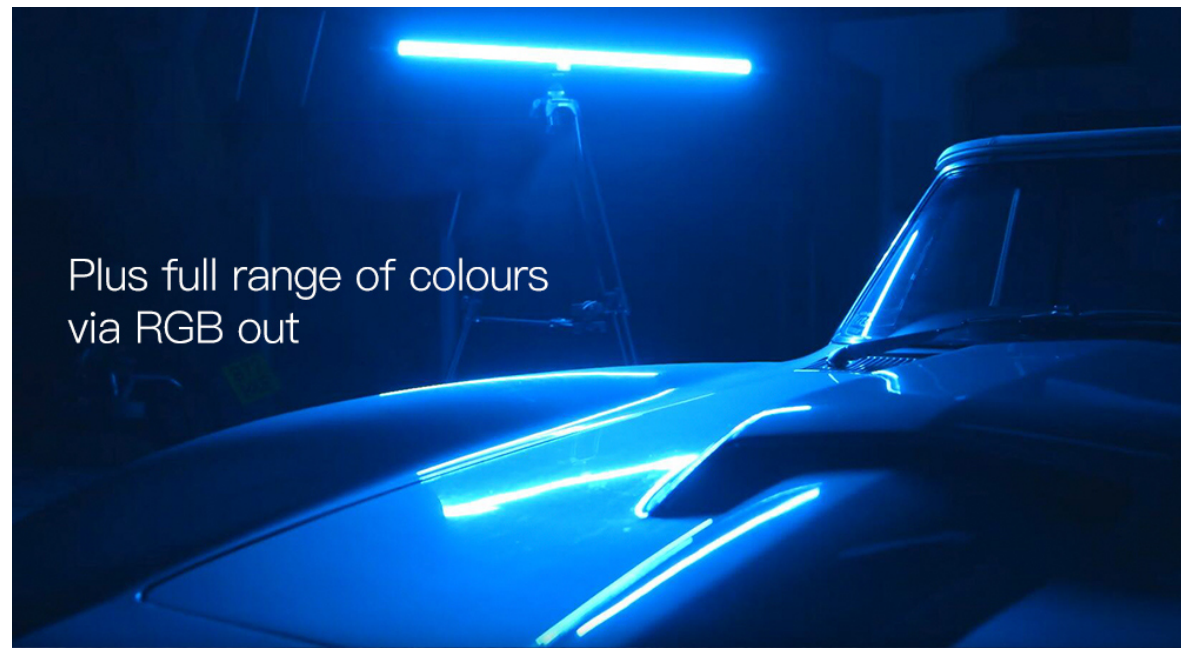

## VARIOUS USING WAY

Studio-Quality Lighting

Plus full range of colours  
via RGB out

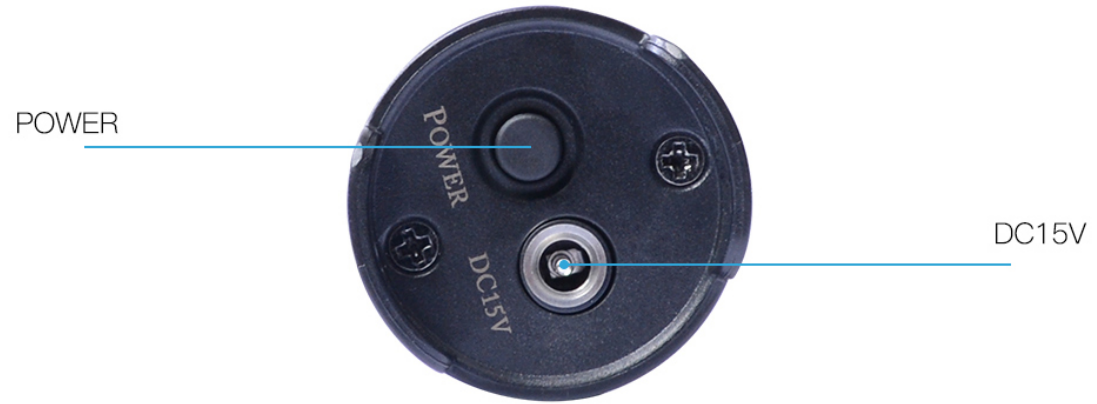

Outdoor Lighting
